Unlocking the Complexity of Oncology

Orchestrated by

Perfect Touch Events

24th - 25th SEPTEMBER, 2026

InterContinental Cairo CityStars

Welcome to AAICC 2026

Welcome to the 10th Edition of the Arab African International Cancer Congress (AAICC 2026) by the Advanced Integrated Cancer Foundation (AICF). It is our great pleasure and honor to welcome our distinguished speakers, delegates, researchers, healthcare professionals, and industry partners from around the world as we gather on September 24–25, 2026, for this milestone event.

This years theme, «Unlocking the Complexity of Oncology», reflects the dynamic and multifaceted nature of cancer care in the modern era. As our understanding of cancer continues to evolve, oncology is becoming increasingly sophisticated—integrating molecular science, precision medicine, artificial intelligence, innovative therapeutics, multidisciplinary collaboration, and patient-centered care. The complexity we face is not a barrier; it is an opportunity to deepen our knowledge, refine our strategies, and improve outcomes for patients worldwide.

AAICC 2026 serves as a platform where experts from diverse oncology disciplines come together to explore the challenges and opportunities shaping the future of cancer care. Through the congress› scientific sessions, interactive workshops, multidisciplinary discussions, and collaborative networking opportunities, we aim to bridge knowledge gaps and transform complexity into actionable clinical insights.

As we celebrate the 10th edition of AAICC, we also celebrate a decade of scientific collaboration, educational advancement, and commitment to improving the lives of patients affected by cancer.

Looking ahead to 2027, we will continue our journey by exploring the next frontier of oncology innovation. Building upon the insights gained from understanding the complexities of cancer today, we will focus on the transformative technologies, futuristic treatment paradigms, and personalized approaches that are expected to redefine cancer care in the years to come. The discoveries and collaborations initiated at AAICC 2026 will serve as the foundation for this exciting future.

Thank you for being part of AAICC 2026. Your participation, expertise, and dedication are essential to advancing oncology and unlocking the discoveries that will shape the future of cancer care.

The AICF (Advanced Integrated Cancer Foundation)

Since November 2018, The Advanced Integrated Cancer Foundation (AICF) has proven its resource fullness to the integrated multidisciplinary medical oncology and radiation therapy by creating and reinforcing the cross borders links as one of the advanced academic institution with an integrated system that plays a leading role In expertise sharing and expert communication, inspire and transfer updates through presenting the best level of evidence merged with the basic science to consolidate the goal of best-applied evidence-based clinical practice, Training and applied clinical skills find its place as a major critical component of the mission of the institution by sharing knowledge with a high-specialized team in radiotherapy workshops and scientific meetings which creates a new experience of the updated modalities of radiation technology.

The institution presents parallel platforms for intellectual exchange mobilize planning monitor scientific inquiry of both updates and basic science. All of these goals are constructed through the development of one of the biggest oncological scientific congress in the middle east held annually since 2018 in Egypt which named the Arab African International Cancer Congress AAICC Every year we build for more active participants of specialists and experts all over the worlds to grow up with the hierarchy of the growing research, scientific papers, critical appraisal, communication and presentation skills.
